# PULSONIC

- Manufacturer of automatic weather stations and hydrological stations
- Nearly 40 years of experience (created in 1984)
- First supplier of weather stations to Météo France (soon 1000 stations)
- Present in more than 20 countries in Africa
- 80% of our activity is exported
- Certified ISO 9001-2015
- Dynamic, agile and customer-oriented company
- Wide range of products

# Range of products

## • Hydro and Weather Stations

- Synoptic weather stations
- Climatological weather stations
- Agrometeorological stations
- Rain gauge stations
- Hydrological stations

## • Software

- RADOME: Management of the weather station network
- PULSOWIN: Consultation and management of meteorological data
- PULSOWEB: Web application for viewing meteorological data.

# What makes us different

- **Complete offer**  
(meteorological and hydrological stations, installation, training, maintenance, weather data processing...)
- **Waterproof and rugged equipment for harsh environments**  
(high temperatures, humidity, sand, insects...)
- **Quick and easy installation.**
- **Compact equipment.**
- **Low energy consumption** (small solar panel integrated in the enclosure)
- **GBON friendly solutions**

Merci !

Thank you !
